WORK EXPERIENCE

Tech Consulting Intern, Data and Artificial Intelligence Team | EY | Singapore Jun 2026–Nov 2026 |

- Supported the delivery of a full-stack technology solution built using Microsoft Fabric and Azure, working between development teams and client stakeholders.
- Developed Power BI dashboards and translated client requirements, feedback, and business needs into clear actions for the project delivery team.
- Tracked client feedback, maintained project documentation, coordinated deliverables, and conduct quality checks to ensure outputs are accurate and presentation-ready.

Business Development Intern | Mother's Ceramics: Square Feet | Bilaspur, India Mar 2025–May 2025

- Managed CRM updates, order tracking, and client follow-up using 6-Orbit, supporting coordination across customer requirements, stock assignment, and branch-level operations.
- Supported operational workflows by tracking order types, stock availability, allocation requirements, and inter-branch/inter-company coordination across customer projects.
- Conducted site visits for hospital and residential projects to understand client preferences, functional requirements, and purchase drivers in interior design and material selection decisions.

Research Assistant | Gokhale Institute of Politics and Economics | Pune, India Jun 2024–Aug 2024

- Supported academic research on Graham's Theory of multi-country, multi-commodity trade by improving structure, clarity, and presentation of technical economic material.
- Used LaTeX to format research content and communicate complex economic concepts clearly.

Freelance Graphic Designer | UNIPRISM | Pune, India Oct 2023–Jan 2024

- Developed the company's visual identity, designing and iterating on logo concepts in Clip Studio Paint to finalize the logo and colour palette.
- Created marketing and social media graphics consistent with the company's visual identity.

Research Intern | Aviana Solutions LLP | Mumbai, India May 2023–Jul 2023

- Conducted research on food security and the feasibility of providing necessities free of cost, combining policy analysis with consumer welfare and behaviour perspectives.
- Analysed indicators including per capita income, calorie intake, and Gini coefficient to understand consumption patterns, inequality, and household decision-making.
